BACKGROUND

A paradigm shift is taking place in Disaster Management from Relief and Rehabilitation to Preparedness and Disaster Risk Reduction. Emergency preparedness has traditionally focused on stockpiling relief goods and providing urgent services to meet the public's basic needs. In most countries political commitment and financial and human resources are concentrated overwhelmingly on these short-term emergency contingencies. While building up capacities for humanitarian response continues to be a priority for all countries, it is now widely believed that more should be done to reduce the social, economic and human consequences of these emergencies. This translates into a need for placing much greater attention on the implementation of proactive strategies and a call for a more comprehensive approach to building national capacities in emergency preparedness and response as well as in risk reduction, focusing on those communities most at risk. The challenge is to put in place systematic capacities such as legislation, plans, coordination mechanisms and procedures, institutional capacities and budgets, skilled personnel, information, and public awareness and participation that can measurably reduce future risks and losses.

Keeping in view above-mentioned state of Disaster Management Preparedness, IDC Foundation is organizing its 30th National Conference, on Disaster Management Preparedness which aims to bring together leading academic scientists, researchers and disaster management expert to exchange and share their experiences and research covering all aspects of disaster management. It will also provide the premier interdisciplinary forum for researchers, professionals and educators to present and discuss the most recent innovations, trends, concerns and practical challenges encountered and the solutions adopted in the field of disaster management.

MISSION

The core mission of the Conference is to share and reflect on knowledge, experiences and good practices on different aspects of disaster risk management, among various stakeholders, across multiple sectors and disciplines within and outside governments, and at all levels, for building disaster resilient future.

AIMS AND OBJECTIVES OF THE CONFERENCE

With this overarching mission, the Conference has been designed to provide a platform for interaction among researchers, Policy makers and professionals in all relevant sectors.

1. Understanding risks and various types of natural and man made disasters
2. Discussing preparedness of various agencies to respond to emergency situations
3. Disaster risk reduction
4. Early warning for disaster preparedness
5. Capacity building through education, research, training and awareness.
6. Public health emergencies & mass casualty management
7. Role of armed forces, NDRF, police & civil defence forces.
8. Social and sociological aspects of disasters

THEME

Creating disaster resilient future

SUB-THEMES

- Natural and man-made disasters
- Disasters, risk management, mitigation and preparedness
- Disaster risk reduction and development
- Disasters and early warning systems
- Capacity building in disaster preparedness
- Role of communities, NGOs, civil societies and corporate sector in disaster preparedness.
- Health impacts & medical response (disaster epidemiology, public health in disasters)

About IDC Foundation

International Development Centre Foundation, (IDC Foundation) was established in 1997. It is an autonomous, national level, non-profit organization which focuses on community development initiatives to fulfill manifold objectives in the areas of Information Technology, Management Services, Rural Development as well as R & D and Environment related issues. Currently, Shri Paritosh Tyagi, Former Chairman, Central Pollution Control Board New Delhi, is the Chairman and Managing Trustee of the Foundation. Foundation's policy is to empower the under-privileged section of the society through education, health and skill-based development. The sphere of the Foundations activities include issues related to health, education, livelihood and environment. IDC Foundation is currently engaged in imparting training and consultancy in a number of areas of human endeavors. The Foundation has in the past, successfully organized several national level conferences and workshops on following subjects :

- ~ Climate change,
- ~ Water quality,
- ~ Health and Environment
- ~ Air, water and noise pollution
- ~ Hospital waste management,
- ~ Energy conservation
- ~ Information technology.
- ~ Environmental Sociology

The Foundation aims at developing professional, entrepreneurial and management skills at all levels. For discharging these significantly seminal responsibilities, IDC Foundation has a group of public spirited resource persons and multi-disciplinary experts.
